

Anass Badreddine El Hallaoui

Fluent in English & French

+1 581 305 1932 | anass.elhallaoui@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

• Laval University & Ohio State University

Graduation: Dec 2026

B.Sc. in Computer Science (GPA: 3.7/4.0)

EXPERIENCE

• Shopify

May 2025 – Aug 2025

Mobile Engineer

- Led 10+ engineers/designers to ship **Image Search** for the **Shop App (iOS/Android)** for **25M+ users in 6 weeks**.
- Secured all 9 products of Shop Minis with 30+ Metrics, 9 Dashboards and 50+ Alerts on Grafana using Prometheus.
- Built an **AI image similarity system** using vectors to analyze **55M+ images** and returning the most similar image to client queries in **<3s**.
- Invited to **Shopify's headquarters** to present to **Shopify's CEO, Tobi Lütke**, to publish our **intern project in PROD**.

• Adobe

May 2025 – Present

Software Engineer Ambassador

- Led SWE-focused workshops internationally, teaching students and developers to build real-world projects using Adobe tools, reaching **500+ participants**.
- Created educational content for Adobe tools, increasing adoption and engagement across 3 universities and hackathons.

• Shopify

Jan 2025 – Apr 2025

Infrastructure Security Engineer

- Created inter-service gRPC communication for **Shopify Restricted**, increasing **speed 10x**.
- Enhanced Redpanda with mutual TLS on GCP, enabling Shopify to adopt it; praised by **RedPanda CEO Alexander Gallego**.
- Migrated **15+ critical internal** services from GCR to Artifact Registry due to Google's Transition.
- **Fixed a critical firewall** misconfiguration affecting **75+ GCP resources**, including **7 affecting CEO's office**.

• Intel

Feb 2024 – Sep 2025

Software Engineer Ambassador

- Ran 20 + workshops teaching AI through Intel tools at **10+ universities and hackathons**; reached +100 students.
- Boosted JupyterHub(AI product) **efficiency by 15%** through frontend suggestions shared by my community.

• iA Financial Group

May 2023 – Sep 2023

Software Engineer

- Reengineered a critical legacy service, improving speed by 87%, enabling faster processing of 17K+ salaries per week (\$20M+).
- Resolved a critical privacy issue in the production database, protecting data of 10,000+ clients and employees.
- Developed a toggle feature for agents to manage insurance, resulting in a 50% error reduction and increased client satisfaction.

• Laval University

Sep 2023 – Dec 2024

Teacher Assistant: Probability & Statistics + Theory of Computation

• OpenAI

Nov 2021 – Jul 2022

GPT-3 Beta Tester

RESEARCH

• Princeton University

Jun 2022 – Mar 2025

Fractal Mathematics in Trading Systems

LEADERSHIP & AWARDS

- **STANFORD, NASA, Shopify+ 3 Hackathon Wins**: Outperformed top talent from Harvard, MIT, Tsinghua, Waterloo, etc.
- **\$80K+** in **scholarships** including full-ride U.S. exchange semester.
- **Red Cross Fundraiser**: Coordinated 20 volunteers to amass **over 120k\$** in donations to help children get a proper education.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C#, Go, Bash, PowerShell, SQL, Ruby, R, C, Pine Script, JavaScript, Swift, React, React Native, Kotlin, TypeScript, Rust

Tools & Libraries: Git, Graphite, MySQL, CSS, Bootstrap, PyTorch, scikit-learn, NumPy, Pandas, Rails, Swagger,

SpecFlow, Node.js, CUDA, MCP, Buildkite, Grafana, Swift UI, Swift Concurrency, Xcode, Bitrise, GraphQL, Electron, Figma

Cloud & DevOps: Kubernetes, Spark, AWS, Azure, GCP, Terraform, Rancher, Docker, Kafka, Linux, ServiceDB, Grafana, gRPC, Redpanda, IAM, YAML, Android SDK, Jetpack Compose, Dagger, Postgres

Practices: OOP, SOLID, "Tell, Don't Ask", TDD, Design Patterns, REST APIs, Infrastructure as Code (IaC)
